- DIFF 4 ○ Maximum diffused reflection

Precision manufactured aluminium coated surface, 97% reflectivity (only 3% loss) & 100% color rendering.
DIFF 0 lightweight mirror replacement - ask for your customized C100 with DIFF 0.

3. GOOD TO KNOW

- The C-100 has rounded corners, so it's safe for use in tight locations. Thanks to heavy duty design, you can rig them on trusses and use them in all weather conditions.
- Ropes can be attached via the holes at each corner. The clamp levers have a specially designed friction system: C-Friction. Once you tighten the lever to the desired friction, they will not unscrew. The corners of the frames are replaceable. When sliding them in and out of the truck, they may wear down over time, but the frame will stay safe.
- Please take care and always put on the C-Protection Pads immediately after use.

MOUNTING

Comes with a standard 28mm male spigot.
